SUMMARY

I am passionate about technology, very interested in programming because I consider it a tool that allows me to transform my ideas into reality, applying my creativity and ingenuity without any limit.
I am currently studying programming and working in the area of cloud. I´m keen on working towards objectives. I am a versatile and communicative individual with strong principles.

PROJECTS

Check out my portfolio at **https://bit.ly/CVGIT**, where I showcase various projects, including a Financial Management System in Java and a web scraping and automation program. Additionally, I work as an independent computer technician.
